

## LIST OF CONTENTS

### NUMBER 1

#### i Announcement

<b>T.-C. Cheu</b>	<b>1</b>	Procedures for shape optimization of gas turbine disks
<b>K. K. Tamma and S. B. Railkar</b>	<b>5</b>	Evaluation of thermally induced non-Fourier stress wave disturbances via tailored hybrid transfinite element formulations
<b>B. F. Song and Y. S. Feng</b>	<b>17</b>	The influence of failure mode order on structural system reliability
<b>T. S. Butalia, T. Kant and V. D. Dixit</b>	<b>23</b>	Performance of heterosis element for bending of skew rhombic plates
<b>J. Jirousek and M. N'Diaye</b>	<b>51</b>	Solution of orthotropic plates based on $p$ -extension of the hybrid-Trefftz finite element model
<b>S. S. Seleim and J. B. Kennedy</b>	<b>63</b>	Imperfection sensitivity of stiffened cylinders subjected to external pressure
<b>L.-W. Chen and L.-Y. Chen</b>	<b>71</b>	Thermal buckling analysis of laminated cylindrical plates by the finite element method
<b>K. M. Liew, K. Y. Lam and S. T. Chow</b>	<b>79</b>	Free vibration analysis of rectangular plates using orthogonal plate function
<b>J. L. Meek and S. Loganathan</b>	<b>87</b>	Geometric and material non-linear behaviour of beam-columns
<b>G. J. Turvey and M. Salehi</b>	<b>101</b>	DR large deflection analysis of sector plates
<b>B. A. Halabieh and W. K. Tso</b>	<b>113</b>	Simplified procedure for lateral load inelastic analysis of framed-tube structures
<b>M. S. Kuczma and R. Świtka</b>	<b>125</b>	Bending of elastic beams on Winkler-type viscoelastic foundations with unilateral constraints
<b>T. K. Datta and A. K. Jain</b>	<b>137</b>	Response of articulated tower platforms to random wind and wave forces
<b>Y. W. Kwon</b>	<b>145</b>	Simplified finite element analysis of double cantilever beams
<b>M. S. Williams and P. Waldron</b>	<b>151</b>	Longitudinal stress wave propagation in an unbonded prestressing tendon after release of load
<b>W.-J. Wu and C.-K. Chen</b>	<b>161</b>	Transient response of a spiral fin with its base subjected to a sinusoidal form in temperature
<b>A. K. Jemah and F. W. Williams</b>	<b>171</b>	Compound stayed column for use in space

	<i>Technical Notes</i>
R. D. Cook	179 Finite element analysis of closely-coiled helical springs
K. Kanaka Raju, N. Rajasekhara Naidu and G. Venkateswara Rao	181 Stability of moderately thick annular plates under uniform internal load
	I Software Survey Section
	NUMBER 2
	i Announcement
A. Raman	185 A non-iterative method of structural optimization for static, dynamic and response problems
N. R. Iyer and T. V. S. R. Appa Rao	191 Studies on stress concentration at shell-column junctions of hyperboloid cooling towers
G. Jayaraman, P. Chen and V. W. Snyder	203 Free vibrations of rectangular orthotropic plates with a pair of parallel edges simply supported
N. Krishnamurthy and D. P. Thambiratnam	215 Finite element analysis of column base plates
A. Shirazi-Adl and S. C. Shrivastava	225 Large deformation finite element treatment of changes in the volume of fluid-filled cavities enclosed in a structure
W. M. G. Courage, P. J. G. Schreurs and J. D. Janssen	231 Estimation of mechanical parameter values of composites with the use of finite element and system identification techniques
T. Iwakuma	239 Timoshenko beam theory with extension effect and its stiffness equation for finite rotation
M. G. Kittur and R. L. Huston	251 Finite element mesh refinement criteria for stress analysis
A. S. Nazmy and A. M. Abdel-Ghaffar	257 Three-dimensional nonlinear static analysis of cable-stayed bridges
Huang Dao-an	273 A general solution of the orthotropic continuous rectangular plate
F. Tin-Loi, V. A. Pulmano and D. Thambiratnam	281 BEF analogy for axisymmetrically loaded cylindrical shells
S. N. Patnaik and H. G. Satish	287 Analysis of continuum using boundary compatibility conditions of Integrated Force Method
J. R. Xie, Y. Z. Chen and D. Ho	297 Axisymmetric buckling of truncated shallow spherical shells

- S. Elangovan** 303 Analysis of funicular shells by the isoparametric finite element
- Y. T. Hsu, C. C. Fu and D. R. Schelling** 313 An improved horizontally-curved beam element
- G. Muscolino** 319 Analytical evaluation of structural response for stationary multicorrelated input
- Z.-H. Zhong and L. Nilsson** 327 A contact searching algorithm for general 3-D contact-impact problems
- C. J. Chen, R. M. Gutkowski and J. A. Puckett** 337 B-spline compound strip analysis of stiffened plates under transverse loading
- D. G. Mangsuli and V. Ramamurti** 349 Lanczos method applied to the solution of eigenvalue problems of cyclic symmetric structures

## I Software Survey Section

## NUMBER 3

## i Announcement

- B. W. R. Forde, R. O. Foschi and S. F. Stierner** 355 Object-oriented finite element analysis
- T. A. Stone, J. L. T. Santos and E. J. Haug** 375 An interactive pre-processor for structural design sensitivity analysis and optimization
- S.-C. Lee and C.-K. Chen** 387 Finite element solution for turbulent forced convection between parallel plates
- S. A. Al-Kaabi and G. Aksu** 395 Free vibration analysis of Mindlin plates with parabolically varying thickness
- L. Szabó** 401 Tangent modulus tensors for elastic-viscoplastic solids
- S. Y. Lee and H. Y. Ke** 421 Free vibrations of non-uniform beams resting on non-uniform elastic foundation with general elastic end restraints
- C. Militello and C. A. Felippa** 431 A variational justification of the assumed natural strain formulation of finite elements—I. Variational principles
- C. Militello and C. A. Felippa** 439 A variational justification of the assumed natural strain formulation of finite elements—II. The  $C^0$  four-node plate element
- A. K. Jain** 445 Inelastic response of reinforced concrete frames subjected to the 1985 Mexico earthquake

<b>M. N. Viladkar, P. N. Godbole and J. Noorzaei</b>	455	Some new three-dimensional infinite elements
<b>R. C. Kar and T. Sujata</b>	469	Parametric instability of an elastically restrained cantilever beam
<b>R. R. Wakefield and F. Tin-Loi</b>	477	Mathematical programming and uniqueness in non-holonomic plasticity
<b>G. Deshmukh and M. Pecht</b>	485	A modified Powell method for six-degrees-of-freedom platform kinematics
<b>L. Yang and L. Y. Ye</b>	493	Study of the behavior of a composite multi-bolt joint
<b>J. H. Choi and K. K. Choi</b>	499	Direct differentiation method for shape design sensitivity analysis using boundary integral formulation
<b>M. R. Taheri and E. C. Ting</b>	509	Dynamic response of plates to moving loads: finite element method
	I	Software Survey Section
		<b>NUMBER 4</b>
	i	Announcement
<b>N. Paydar and G.-J. Park</b>	523	Optimal design of sandwich beams
<b>C. W. Chang</b>	527	Cartesian-based control of a deformable robot manipulator
<b>M. Gorji and A. R. Akileh</b>	537	Elastic-plastic bending of annular plates with large deflection
<b>G. Shi and S. N. Atluri</b>	549	Active control of nonlinear dynamic response of space-frames using piezo-electric actuators
<b>G. Karami, M. Farshad and M. R. Banan</b>	565	Spatial buckling of arches—a finite element analysis
<b>S. Pala and G. Özmen</b>	577	Lateral load analysis of multi-storey structures considering axial deformations
<b>Z. Ji and K. Yeh</b>	585	General solution for nonlinear buckling of non-homogeneous axial symmetric ring- and stringer-stiffened cylindrical shells
<b>S. D. Garvey, J. E. T. Penny and A. J. Gilbert</b>	593	The reduction of computation effort in Kron's methods for eigenvalue and response analysis of large structures
<b>I. Senjanović and Y. Fan</b>	603	On modelling of thin-walled girders and accuracy of vibration analysis performed by the finite element technique related to ship structures
